Now! Blue Grass Germination In 10 Days or Less!

PARK KENTUCKY BLUE GRASS

Disease Resistant—Makes Dense Sod—Germinates in 10 Days

This exciting new variety has the qualities you have been looking for. It starts faster, possesses more seedling vigor, and is easier to establish than any other Blue Grass on the market today! Its dense sod crowds out weeds because of its vigorous, deeper root system. Stays greener longer in summer and is much more drought resistant. 1 lb. covers 500 sq. ft. so goes almost twice as far. Supplies of seed are much larger this year but with the wonderful results our customers have had with Park, we expect this supply will not last all season. Order early!

78 YEARS Serving the Middle West We Are One of the Oldest Seed Houses in America

ARCHIAS' GUARANTEE

Because we grow and sell large quantities of Seeds, Nursery Stock, etc., we can sell first quality stock at reasonable prices. Everything we ship must please you or you may return the merchandise within ten days for a full refund of the purchase price or have your order refilled without additional cost. But it must be understood, we do not guarantee the crop, thereby, in common with all reliable seedsmen, we warrant only to the extent of the purchase price, that seeds or bulbs sold are as described on the container, within recognized tolerances. We give no other or further warranty, expressed or implied.

NURSERY STOCK GUARANTEE

We guarantee the nursery stock we send out to be completely satisfactory. If you are not pleased with it in every way when you receive it, return it promptly, at our expense, and it will be replaced or your money refunded, whichever you prefer. After you have planted it, if it fails to grow, we think we should both take part of the blame. We will take one-half and you and the weather take the other, and we'll replace at half price anything unsatisfactory through fault of the stock, if you will notify us not later than October 1st. We cannot be responsible for losses caused by unfavorable weather and improper planting care. Balled Evergreens and Trees (supplied with ball of earth on roots) and special sales items are not covered by replacement agreement.

HOW TO ORDER

USE OUR ORDER SHEET. It will help us greatly in filling your order correctly and speedily, if you use the Order Sheet sent you with the catalog. Please Keep a Copy of Your Order.

HOW TO SEND MONEY. Remittances can be sent safely by P. O. Order, Bank Draft, Express Money Order, or Check. We accept clean stamps for sums less than \$1.00.

C.O.D. ORDERS. No bulbs, strawberry plants, roses, or other perishable stock will be sent C.O.D. Seeds and other non-perishable items only when at least 25% of the total purchase price has been paid with order. We will ship non-perishable items C.O.D. for postage due or balance of postage due when requested by the customer. Just mark order (ship C.O.D. for postage due) in space provided on the order blank.

24-HOUR SERVICE. Orders received in the morning are usually shipped the same day. We have every facility for filling and shipping orders promptly. Nursery stock and other perishable items will not be sent until planting time, and when weather permits.

OUR RESPONSIBILITY. This is our 78th year in the seed business and we know personally most of our customers. Those of you who have not bought from us before, we refer you to any bank in the State of Missouri for reference.

DON'T FORGET POSTAGE. Except for items which are marked postpaid, delivery charges are paid by the purchaser. Be sure to include sufficient postage at the zone rates to cover your order. Large packages or shipments of considerable weight travel more cheaply by express or freight. When you do not know the postage required we will ship C.O.D. for postage due when requested on your order.

JIFFY PEAT POTS

ELIMINATES PLANTING SHOCK

Jiffy Pots by the millions have been used by gardeners. They are made in Norway of pressed peat, with special nutrients added, and they do wonders for your plants . . . in a hurry! Start your flower and vegetable plants in Jiffy Pots, and let the roots grow right through the pot walls.

The pot provides ideal root aeration. And you'll find it saves you time, space and effort. When you put the plant outdoors, plant the pot and all. It is nearly perfect for root development because water is retained longer around the roots. It adds organic peat to improve your soil, too.

Avoid transplanting shock. Plant pot and all—pots disintegrate quickly after transplanting. Choose from either square or round.

HOW TO GROW WATERMELONS

Plant seed after all danger of frost has passed and the soil has become thoroughly warm. Place 6 to 8 seeds in groups, allowing 2 to 3 inches between the seeds and space the groups 6 to 8 feet apart each way. Cover seed with ½ inch of fine soil. Thin to 2 or 3 plants in each group after plants are well established.

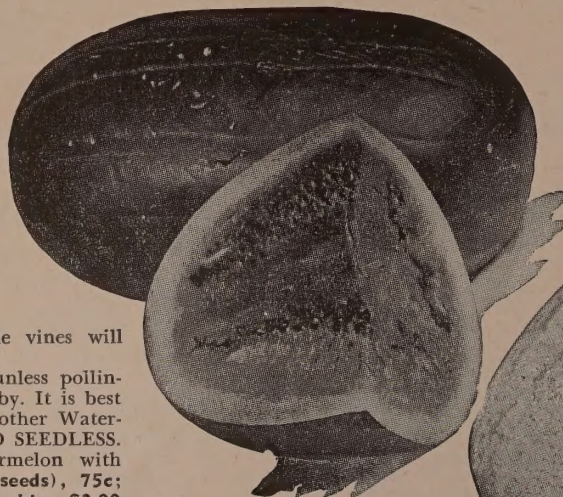

F₁ Hybrid SEEDLESS Watermelon. (80 days.) This is Tri X-313 Hybrid. Enjoy the luscious goodness of a Watermelon that is all edible but the rind.

This new Triploid hybrid produces medium-large oval fruits, averaging 10-15 lbs. or larger, with solid bright red flesh of the sweetest flavor. Scattered through the flesh are small soft white seedcoats which are completely edible.

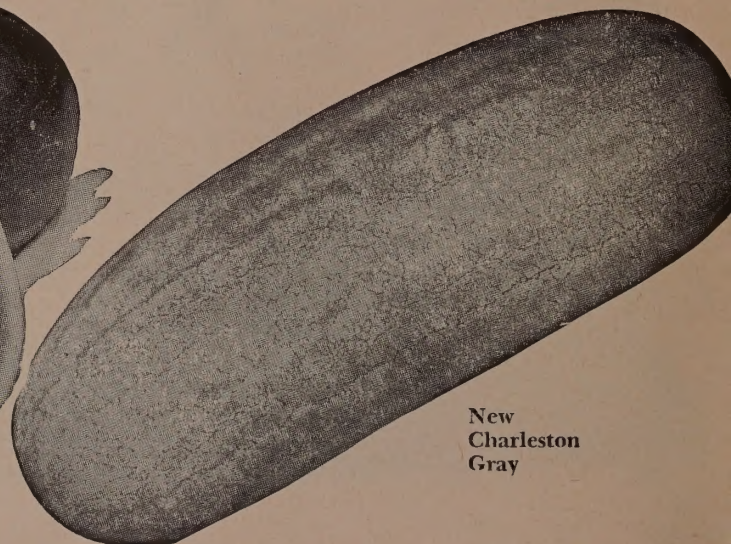

The green striped melons are borne on healthy vigorous vines that resist disease. This hybrid is easier to grow than other "seedless" types of Watermelon, and the vines will hold up better in the garden.

Seedless Watermelons will not set fruits unless pollinated by normal Watermelons planted nearby. It is best to have one hill of Sugar Baby, or some other Watermelon, to every 2 or 3 hills of F₁ HYBRID SEEDLESS. We include seeds of Sugar Baby Watermelon with every order of seedless.

Archias' Famous for Quality LAWN SEED

New—HORMONE and ARASAN Treated—at no Extra Cost

ARCHIAS' HORMONE AND ARASAN TREATED LAWN SEED will give you a healthier, greener, more permanent lawn than untreated seed will. The Hormone treatment causes more seeds to grow, gives them more strength to root, and "take hold." The addition of Arasan makes seed more resistant to "damping off"

and other soil borne diseases. The combination of the two makes for a healthier, greener lawn.

You use less of Archias' lawn seed because our seed is cleaner, more weed and chaff free. For new lawn—at the rate of 1 pound to 250-400 square feet. To replenish old lawn, cut quantity in half.

ARCHIAS' "EVERGREEN" Lawn Grass Mixture

The best general purpose mixture for Missouri, as it makes a vigorous year-round growth with only average attention. Composed of extra heavy plump seeds—the very best Kentucky Blue Grass, Certified Perennial Rye Grass, Creeping Bent, Agrostis Alba, Creeping Red Fescue and White Dutch Clover. We invite your comparison of our "Evergreen Mixture" with the highest priced seed offered anywhere.

Easy to Use PLANT FOODS

"The Miracle Plant Food" RA-PID-GRO

USE RA-PID-GRO EVERY 2 OR 3 WEEKS throughout the season for the best results from both new and old plantings. Water thoroughly after fertilizing.

Ra-Pid-Gro is so easily prepared for use. Just add water at the rate of 1 pound of Ra-Pid-Gro to 22 gallons of water. Allow to dissolve and it's ready for use. Apply around the plants according to directions on the can. For use on small numbers of plants, mix at the rate of a teaspoonful of a quart of water. Also very valuable for use when transplanting. Dip plants in solution for 3 or 4 minutes.

Stop Expensive Transplanting Losses

By using a large tub or pail and mixing Ra-Pid-Gro with water at the rate of 22 gallons of water to 1 pound, you have a solution in which to dip the roots of the plants before setting out. If this is done, you will practically eliminate transplanting losses. Trees, shrubs, Roses, evergreens, and similar plants should be set in the solution 3 to 4 minutes. Berry plants 1 minute. Vegetable and house plants just dip and remove. Grass and vegetable seeds should be sprinkled with Ra-Pid-Gro before sowing. Use the solution for watering after setting out plants or sowing seed.

ALFALFA

VERNAL. **KANSAS COMMON.**
BUFFALO. **GRIMM.**
RANGER.

NEW! ALFALFA

CODY. Aphid resistant.

EMBRO A-24 BRAND ALFALFA.
For short rotation—rapid growth after cutting—extra tonnage—2 to 4 year rotation.

EMBRO A-59 BRAND ALFALFA.
For long rotation, 5 years or more. Finest quality hay—increased yields—extreme winter hardiness—resistance to Bacterial Wilt.

BROME GRASS

The Miracle Drought Resister
ACHENBACH. (Southern Strain).
SOUTHLAND. State Certified.

ORCHARD GRASS

Native—Adapted!

One of the best long-lived pasture or hay grasses. Does well on most all soils. Sow in early spring or fall.

TIMOTHY

"Missouri Grown." Quality Timothy from the best producing area.

RED TOP

Grows on good soils and poor soils, stands lots of wet and also drought. Grows quickly to prevent soil erosion on waterways. Easy to start—sow with Timothy and with lawn grasses.

REED CANARY GRASS

On low, wet, poorly drained soils, on thin, eroded hillsides, Reed Canary comes through like a champion. Reed Canary makes wonderful pasture, excellent high yielding hay and once established makes a tough sturdy sod that lasts for years.

See Farm Seed Price List for prices.

FIELD CLOVER

KENLAND RED CLOVER. New. Very productive.

MEDIUM RED CLOVER. Central States grown.

ALSIKE. Does well on wet heavy soil. High in protein.

LESPEDeza

IOWA-6. Tall growing early variety. Fine leaf and stem, heavy producer.

EARLY No. 19604. Also known as Early Giant.

KOREAN. Old standby.

SERICEA. Hardy perennial variety.

SWEET CLOVER

White Blossom Sweet Clover.

Yellow Blossom Sweet Clover.

Mixed Sweet Clover (Yellow and White).

Unhulled Sweet Clover.

Hubam, Annual Sweet Clover.

Madrid, New Yellow.

KY. "31" FESCUE

Does best as a permanent pasture grass, improves with age. Builds a heavy, dense sod, prevents erosion. Grows anywhere; sow fall or early spring.

GIANT LADINO

Ladino is the largest growing form of White Clover. It is a long-lived perennial, excellent for grazing, as well as producing a most nutritious and palatable hay crop. Its tap root goes down one to three feet. The stems run on the ground, taking root. Not subject to Alfalfa diseases; ideal to plant after Alfalfa. Does not bloat livestock as much as other Clovers, but is safer to plant with Timothy, Red Top, Tall Fescue, Kentucky Blue Grass, Orchard Grass and Rye Grass.

See Farm Seed Price List for Prices.

PASTURE MIXTURES

Archias' BASIC MIX No. 1

For Permanent Pastures
Grasses and Clovers

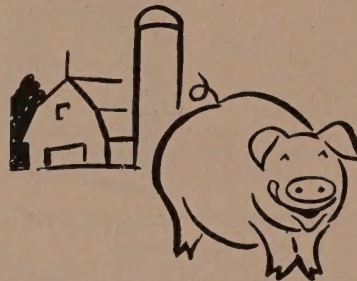

Proven, university tested, pasture seeding that will give you excellent results. Properly blended to give ample grass, to reduce danger of bloat. Plenty of legume for soil improvement. Contains variety of seed that livestock like. This seeding will last for years, producing maximum pasture days and feed for cattle or hogs.

This mixture contains approximately 25% Brome Grass, 25% Tall Fescue, 10% Orchard Grass, 20% Alfalfa, 10% Timothy, 5% Red Top, 5% Ladino Clover.

This is not a cheap mixture, but our very best seed, properly blended and "chemically treated" at no extra cost. Sow 16 to 18 pounds to the acre. See Farm Seed price list for prices.

"Cheap but Good" Pasture Mixture

for hay and permanent pasture. A fine mixture of 9 different grasses and Clovers, including Red Clover, Alfalfa, Lespedeza, Alsike, Kentucky Blue Grass, Fescue, Orchard Grass, Timothy, Birdsfoot Trefoil. Well mixed and balanced blend. Good quality seed at a low price. Sow 18 to 20 lbs. to acre.

PIG'S DELIGHT QUICK HOG PASTURE

A rapid growing mixture of legumes, forage and grass crops. Can be used a few weeks after seeding. Very productive. High in protein. Builds big body frames, reduces grain consumption. Makes hogs of marketable size in quicker time. Contains Vetch, Rape, Rye, Barley, Sudan, Wheat, etc. Sow 30 to 40 lbs. per acre early in spring.

\$9.95 per 100 lbs.; 50 lbs., \$5.50

DWARF ESSEX RAPE

Quick pasture for hogs, sheep and cattle. Sow spring or summer—follow early grain. Use 5 to 6 lbs. per acre. 3 lbs., \$1.00; 5 lbs., \$1.50; 10 lbs., \$2.75, postpaid. See Field Seed price list for quantity prices.

BIRDSFOOT TREFOIL

Sow 5 to 8 lbs. per acre alone—less in mixtures.

A hardy, deep rooted, long-lived legume, fine stemmed and leafy with feeding value equal to Alfalfa. Will grow on land too low in fertility for Alfalfa; stands heat and drought. Especially valuable in permanent pastures. We offer only the broad leaf variety which is recommended for this section. See Field Seed Price List for quantity prices.

Postpaid: 1 lb., \$1.25; 5 lbs., \$6.00; 10 lbs., \$11.50

"TOP PRODUCTION" PASTURE MIXTURE

2/3 Clovers Balance Timothy and Kentucky 31 Fescue

"Chemically Treated" Ready to Sow

Our most popular Clover and grass seed mixture containing the proper amount of Red Clover, Alsike, Sweet Clover, Alfalfa and Ladino Clover, along with the right amount of Timothy and Fescue to support the Clovers and to add weight and growth. You will find "Top Production" Mixture an excellent combination for both pasture and meadows, producing large quantities of hay for pastures, at the same time controlling erosion and building up your land. There is no other mixture that will do so much for you. We use only our very best grade Clovers, Fescue and Timothy. All have been "chemically treated" and properly blended, ready to sow. Sow at the rate of 10 to 12 pounds per acre. See the Farm Seed Price List for prices.

If you want this mixture without Sweet Clover ask for "Top Production B Mixture."

A. S. C. MIXTURE "B"

A fine mixture to establish a sod cover of perennial legumes and grasses for soil protection. Makes permanent pasture land to hold a long time. Contains 50% Orchard Grass, 5% Ladino Clover, 20% Alfalfa, 25% Timothy. Sow at the rate of 20 lbs. to the acre.

frontier[®] Hybrid Sorghums

WINNING VARIETIES FOR EVERY FIELD AND CLIMATIC CONDITION

Pick the Frontier seed YOU need . . . for higher yields in good clean fields! Frontier Hybrids are grown under conditions ideal for seed production . . . and every precaution is taken to bring you seed high in germination and with strong seedling vigor!

FRONTIER 400-B

Heaviest yielding of all Frontier varieties—when all areas and growing conditions are considered. A triple-cross hybrid for heavy grain yield on both dry and irrigated land. Exhibits high resistance to drouth and milo disease.

HYDAN 37

A NEW sorghum sudan-grass hybrid. Early maturing—with yield potential higher than that of any present Sudan variety. It is tall and leafy, growing up to 9 ft., depending on moisture and fertility. Very high in resistance to root lodging and drouth.

FRONTIER 410-B

Unusually large juicy stalk for good standability under all conditions. Easy to combine. Outstanding yields under irrigation and good yields dryland. Resistant to milo disease.

Frontier now guarantees a satisfactory stand or re-plant seed Free! If for any reason you do not get a satisfactory stand write us for application form for seed replacement.

FRONTIER 410-E

Another outstanding Frontier first! Shortest hybrid on the market today! Excellent seedling vigor and emergence. Complete resistance to milo disease. Resists chinch bugs, foliage disease and head smut.

FRONTIER 411

One of outstanding grain types on the market today! Short heavy stalks and large root structure withstand lodging under most adverse conditions. Produces under severe drouth conditions, resists milo disease and chinch bugs.

FRONTIER S-210

This high protein forage helps produce more pounds of beef per ton of ensilage! Extremely drouth resistant, with excellent standability even in high winds. Early maturity and high yields!

"CERTIFIED" ATLAS SORGO

Produces 15 to 20 Tons Fodder per Acre.

The heaviest producing Sweet Sorgho known. Out-yields Corn 3 to 1. A matchless drought resister, Atlas remains green when Corn is completely dried up. Makes a palatable and nutritious feed, especially for cattle. Grows 10 to 12 feet tall. Every farm should have at least 10 acres planted to this valuable crop. The grain makes an excellent chicken feed, too. We offer genuine "State Certified" Atlas Sorgho. Certified seed is the cheapest and safest to buy.

5 lbs., \$1.50; 10 lbs., \$2.25, postpaid to 3rd. zone
See Farm Seed List for quantity prices.

SUDAN GRASS

PIPER SUDAN. "Certified." Piper Sudan Grass was developed and released in Wisconsin by the Agricultural Experiment Station, and has been extensively tested in Missouri and found to be taller than Wheeler, recovers faster after cutting, and has greater leaf spot and chinch bug resistance. Growing plants have shown far less prussic acid potential than other varieties. We have had excellent reports on this variety.

GREENLEAF. A Kansas State College selection that has proven to be highly resistant to leaf diseases; superior leafiness, tillering and vigor. Low in prussic acid content. These characteristics result in high forage production over a long grazing season. Safe to pasture, for many years Kansas' most dependable Sudan Grass variety. "Blue Tag" certified quality. See price list for prices.

SWEET SUDAN. "Certified." Sweet Sudan is a greatly improved variety from a hybridization of Leota Red Sorghum and Common Sudan. It has great palatability, livestock eating it to the ground before touching Common Sudan. Stalk contains more sugar, making it higher in feeding value.

New! Hybrid Sudan

HYDAN 37

A new Sudan Grass Hybrid with higher yield potential than any present Sudan. Yields as much as 25 tons to the acre reported. You'll want to try Hydan 37 on a part of your Sudan acreage—but order early, seed supply very limited! See farm seed price list for prices.

Station Hybrids GRAIN HYBRID SORGHUMS

We list 3 of the leading Numbers of Station Hybrids grown in the northern section, in isolated fields away from Johnston Grass and other noxious crosses. "State Certified" for highest quality.

R.S. 590. This is a good all-round hybrid maturing in 98 days with standing ability good—fine yield increases over Martin's and Redbine 60.

R.S. 610. Medium early, of combine height, semi-dry headed. Grain very light red—excellent standing ability—about 100 days.

R.S. 650. This hybrid is a few days later than 590—has a very high yield potential—a cross between Plainsman and MS385; well adapted over a wide area—semi-dry headed.

See Farm Seed List for Prices.

OPEN POLLINATED GRAIN SORGHUMS

We carry large stocks of the leading varieties. See price list for prices.

Small quantity, 5 lbs., \$1.50; 10 lbs., \$2.25, postpaid to zone 3.

MARTIN. "Certified." 100 days. Good producer.

WESTLAND. "Certified." 95-105 days. Disease resistant.

REDBINE 60. "Certified." Red seeded. Early.

CANE for Fodder

Native and Kansas grown canes for quick hay and pasture. See price list for varieties and prices.

Archias' "Adapted" SEED CORN

MO 843 Outstanding new yellow hybrid for northern and central regions. High yield, large ears. Adapted to mechanical picking. Highly recommended. Mid-season.

KANSAS 1639 A midseason yellow hybrid just slightly later than U. S. 13. Especially well adapted to northern and central Missouri where it has exceeded U. S. 13 in yield. Kansas 1639 is similar in height to U. S. 13, ears borne lower on the stalk. Better stalk lodging resistance, drops fewer ears, has better husk cover, is more drought resistant than U. S. 13.

U. S. 13 Archias' Special Strain. Main crop yellow. 120-125 days. A grand hybrid in every way and very popular throughout the Corn belt. Single ear tendency. Deep kernels high in feeding value. Resistance to drought and chinch bug. Shucks easily. Stands up well.

U. S. 523W—White

A white Corn suitable for the milling trade with a long, outstanding yield record for central and southern Missouri. U. S. 523W is mostly single eared, resistant to Corn ear worm, grasshoppers and chinch bugs—good standability and husk color. A real money maker where the demand for white Corn is good.

Open Pollinated Varieties

REID'S YELLOW DENT

This is Missouri's best known variety of open-pollinated Corn. Average maturity 110 days. Ears 9 to 13 inches long, well filled from tip to butt. Deep close set grains. Heavy producer on good ground. See price list that came with your catalog for prices.

90-DAY YELLOW

A quick growing yellow variety, highly desirable and popular with feeders who want an early feeding Corn. Matures in about 90 days. Archias' 90-Day Yellow ears are about 10 inches long, sometimes two to the stalk; deep, moderately rough kernels high in protein and oil content make it an excellent feeding Corn.

MILLET SEED

Sow 30 to 40 pounds to the acre. "Certified" GERMAN MILLET. Improved strain of this fine Hay type. Excellent to follow Beans and grain harvest.

GOLDEN or HAY MILLET. It is sown in the spring, and after harvesting leaves the ground in the finest condition for Wheat.

KAFIR

5 lbs., \$1.50; 10 lbs., \$2.25, postpaid to 3rd zone. **KAFIR, STANDARD BLACKHULL.** 115 days. Height 5-7 ft.

KAFIR, COMBINE 60. 100 days. Height 3½ to 4½ ft.

HEGARI

5 lbs., \$1.50; 10 lbs., \$2.25, postpaid to 3rd zone. **EARLY HEGARI.** 100 days. Height 4 ft.

HEGARI. 115 days. Height 3 to 5 ft.

HICKORY KING

The white grain is so wide and deep, and the cob so small that often a single grain will cover the end of a broken cob. It has been called the Poor Man's Corn because it can be depended upon to produce a crop on poor, thin land. On good land it bears 2 ears to the stalk. 1 lb., 50c; 3 lbs., \$1.25; 5 lbs., \$1.75; 10 lbs., \$2.95, by mail, postpaid

BOONE COUNTY WHITE

115-120 days. White cob; excellent open-pollinated variety. Fine for ensilage.

IMPROVED LEAMING

A medium maturity (110 days) silage Corn. Makes nice long ears with large, golden grain—excellent soft feeding quality.

WHITE PEARL

75-80 days. Early, quick maturing, white. For early or late planting. Makes fine roasting ears.

SEE PRICE LIST that came with your catalog for PRICES.

CANE for Sorghum

We list two of the best varieties. Owing to the peculiar hybridization of syrup cane varieties, it is impossible to guarantee the crop—our seed comes from our own farmer customers and we believe it to be good.

SUGAR DRIP (Golden Drip). Makes the finest clear sorghum.

EARLY ORANGE. Makes delicious, mild molasses.

Everblooming FENCE ROSE HYBRID 311

(Pat. 1885)

Here is a Rose which behaves as a "fence" or "hedge" Rose should—a Rose specially hybridized by Armstrong to fill the need for a Rose of this type.

Blooms Continuously. This is no "spring only" bloomer, but from spring until frost it is almost continuously smothered with clusters of medium-sized, semi-double flowers of vivid red. And the color holds bright and lively even in the warmest of weather.

Neat — Compact — Easily Maintained. Handsomely foliaged, bushy and upright, from 4 to 5 feet tall, easy to grow and easy to maintain. Set plants 18 to 24 inches apart.

LARGER
FRUIT

• 'Archias' DWARF FRUIT TREES •

EASY TO PICK
BEAR YOUNG

These Dwarf Fruit Trees are becoming tremendously popular simply because their small size makes it possible for millions now to grow their own delicious home grown fruit, even if their yard is small. Orchardists are planting them because they bear younger, often just a year or two after planting, are easy to take care of, and the fruit is larger.
